OTS Vision Statement

With the belief that Information Technology is a crucial strategic resource for any organization, the Office of Technology Services strives to work together in a spirit of respect, commitment, and teamwork to provide efficient, effective, and innovative technology services and support to the campus community. The Office of Technology Services, working in partnership with the University of Evansville community, is committed to ensuring that faculty, students, and staff have the information technology tools and resources necessary to carry out the University's mission.

Goals:

- Foster a collaborative culture through open internal and external communication.
- Enjoin other departments at the University of Evansville to assist in developing and embracing a shared vision for campus wide IT solutions.
- Create innovative ways to utilize technology.
- Design and deliver new systems and methods that increase productivity.
- Educate users and staff in ways to utilize new technology and enhancements.
